

Winter Sewer Average Opt-Out Form

The City of Smithville created a yearly winter sewer averaging policy for all residents connected to the City sewer system. The intent of this policy to establish monthly sewer charges based on low-usage winter months so that customers are only charged for the theoretical amount of water that goes into the sewer, and NOT water used to fill swimming pools or water lawns. During the billing periods of December, January and February, sewer charges are calculated on actual water usage. This winter sewer average is then applicable to the following nine (9) months of the calendar year.

Customers may request to opt-out of participating in the winter sewer averaging policy. If a customer opts out of the policy, they will be unable to opt in to the program for one complete year.

_____ I do hereby opt out of the winter averaging policy.

_____ I agree that I cannot opt back in to the policy for one year.
