

Board of Alderman Request for Action

MEETING DATE: 5/17/2022

DEPARTMENT: Development

AGENDA ITEM: Bill No. 2938-22 Fairview Crossing Rezoning and Conceptual Plan Approval – second reading by title only.

RECOMMENDED ACTION:

A motion to approve Bill No. 2938-22 for second reading by title only for Fairview Crossing Rezoning and Conceptual Plan Approval.

SUMMARY:

Approving this ordinance would rezone the land and create an overlay district at property located at the northeast corner of Highway 169 and 144th St. to allow a new mixed-use subdivision to be called Fairview Crossing.

BACKGROUND:

This project is on the 53.92 acres at the northeast corner of 169 Highway and 144th Street. The applicant acquired the property after reviewing the Smithville Comprehensive Plan 2030, which identifies this area to be mixed use with a higher density of housing. The plan submitted separates the property into a commercial area to the west of the overhead powerline easement that bisects the property with townhomes and apartments on the east side of that same easement. The conceptual plan process allows developers to create cohesive developments with variances from some of the lot size and access restrictions contained in the zoning code so long as the overall plan meets the intent of the underlying district designation. The approval of a conceptual plan sets the limits of what can be constructed upon the property but gives the developer flexibility to adjust the project to the market, so long as the densities of housing, parking requirements, stormwater management and availability of services is otherwise met.

A conceptual plan is not to be considered as a subdivision that creates separate lots, but as a plan of use and development within the approved scope of that plan. Any subdivision of land for the project is subject to the parameters of this plan but includes substantial additional review matters to be handled separately. The applicant has also requested a preliminary plat approval for the subdivision, which is currently underway and must be presented to the Planning Commission for a recommendation first. This portion of the project will include a development agreement that addresses capabilities/design of stormwater retention facilities, water and sewer requirements, as well as on-and off-site road improvements as described in an approved traffic impact study. Those traffic studies recommend off-site improvements that will allow additional

traffic to properly use and pass this site safely and can include turn lanes, pavement improvements, access points and traffic signals when warranted.

Development, Public Works and Utilities Departments and MoDOT are currently working on review of all of the submitted studies on the second portion of this project submittal to provide comments to the developer prior to any Planning Commission review.

Conceptual Plan approval is a zoning measure that allows the intent of the zoning districts to be met prior to final subdivision design.

AN ORDINANCE APPROVING A REZONING AND CONCEPTUAL ZONING PLAN FOR FAIRVIEW CROSSING ON CERTAIN LANDS LOCATED IN THE CITY OF SMITHVILLE, MISSOURI, UNDER THE AUTHORITY GRANTED BY THE CODE OF ORDINANCES OF THE CITY OF SMITHVILLE, MISSOURI

WHEREAS, The City of Smithville received an application for a Rezoning and a Conceptual Plan approval on A-1 and B-3 land at the northeast corner of 169 Highway and 144th Street; and

WHEREAS, public notice was properly advertised in the Courier Tribune; and

WHEREAS, adjoining property owners were properly notified by certified mail; and

WHEREAS, a public hearing was held before the Planning Commission on April 12, 2022;

WHEREAS, the Commission adopted the findings recommended in the Staff Report and recommended approval of the Fairview Crossing Conceptual Plan.

NOW THEREFORE BE IT ORDAINED BY THE BOARD OF ALDERMEN OF THE CITY OF SMITHVILLE, MISSOURI, THAT;

Section 1. Having received a recommendation from the Planning Commission, and proper notice having been given and public hearing held as provided by law, and under the authority of and subject to the provisions of the zoning ordinances of the City of Smithville, Missouri, by a majority council vote, the zoning classification(s) or district(s) of the lands legally described hereby are changed as follows:

The property legally described as: See Attached Exhibits A-1 and A-2

is hereby designated B-3P and R-3P as contained in the Fairview Crossing Conceptual Plan as approved by the Planning Commission on April 12, 2022 and shown on Exhibit A-2.

Section 2. Upon the taking effect of this ordinance, the above zoning changes shall be entered and shown upon the "Official Zoning Map" previously adopted and said Official Zoning Map is hereby reincorporated as a part of the zoning ordinance as amended.

Section 3. This ordinance shall take effect and be in full force from and after its passage according to law.

PASSED THIS 17th DAY OF MAY, 2022

Mayor

ATTEST:

City Clerk

Application for a Conceptual Plan Approval – Fairview Crossing

Code Sections:

400.200 et seq. Planned Development Overlay District

Property Information:

Address: NE corner of 144th St. and 169 Hwy
Owner: Kansas City Properties & Investments
Current Zoning: A-1 & B-3

Public Notice Dates:

1st Publication in Newspaper: March 24, 2022
Letters to Property Owners w/in 185': March 28, 2022

GENERAL DESCRIPTION:

The property is currently two unplatted tracts lying between 144th St. on the south and the Central Bank property just south of Commercial. The tract is approximately 53 acres and includes a large overhead power line easement that bisects the property. The proposed conceptual plan is for dividing this 53+/- acre parcel into 3 multifamily and 10 commercial lots. The multifamily would include townhomes and apartments with a calculated total of 255 dwelling units upon completion of all buildings, along with 10 commercial lots, including 2 fast food lots, a hotel lot and 7 other retail/commercial lots. Lot sizes vary, but there are some lots that will only access a private drive, which requires the conceptual plan to allow variances from basic lot size and access requirements.

400.200.B.3 Guidelines for review of a conceptual development plan for a Planned Development Overlay District, the Commission shall consider the requirements in the site plan review provisions in Section 400.390 through 400.440 when evaluating the following:

a. Topography; to ensure the site is suitable for development, and buildings are located and arranged in appropriate areas.

Development placement specifically encapsulates the existing drainage areas into the proposed retention pond areas. The estimated layout specifically separates the residential and the commercial areas on either side of the power easement, and leaves significant green space between this development and the adjacent single family. The plan would move the B-3 zoning from the east portion of the project area to the 169 frontage (currently A-1) and down-zone the current B-3 to R-3.

b. Parking; to ensure the proposed development contains an adequate amount of parking and is located in an appropriate area or adequately screened. Generally, the parking should conform to the required number of spaces appropriate to the development type as contained in Section 400.470. The Commission may allow a deviation from these parking requirements should the applicant show an adequate amount of parking exists.

Development is laid out in a fashion to meet the site plan requirements and includes sufficient parking as shown on Page 1 of the submittal. Any minor variations to building size could impact the required parking, but in no event will a tenant be able to increase a building footprint or change a use without adjusting parking to meet these requirements.

c. Setbacks; to ensure buildings provide for adequate light, air, and privacy protection by providing appropriate proportion between buildings, and adequate separation between buildings and adjoining properties.

Development leaves ample spacing between the proposed buildings, as well as the existing facilities, and leaves ample buffer from the single family properties to the east.

d. Architecture; to ensure the architectural theme is compatible and consistent throughout the project and is reasonably compatible with surrounding developments.

The Development is without tenants and seeks to create the overall look of the development without limiting potential tenants. Therefore, this Conceptual plan will require independent site plan reviews of each proposed building, and must meet the site plan requirements in existence at the time of construction, in particular only to the buildings. All other elements are identified and required as show herein.

e. Site plan; to ensure the location and arrangement of buildings, signs and other structures are appropriate for the site, existing and proposed streets, drives and public ways are arranged appropriately and to ensure site drainage has been adequately addressed.

Development prepared and submitted a Stormwater Study and has agreed to construct the required detention structures when the project begins.

f. Landscaping; to ensure the development provides adequate landscaping to provide a pleasant environment, to enhance the building's appearance, to ensure existing significant trees are adequately protected.

The Development has a large abundance of existing vegetation on the east and north, but much of it is of limited quality. Much of the buffer areas from the single family properties to the east will remain intact or converted into detention areas for stormwater protection. As stated, each separate building will be required to complete the site plan review process, and the landscaping and all other review matters will be addressed at that time.

g. Any other feature or issue associated with the State zoning and planning enabling legislation or the Comprehensive Plan for the City of Smithville for which the Commission feels is appropriate and relevant to the development of the site.

Development will include significant off-site traffic improvements that are still being reviewed by MODOT. The traffic study indicates that

multiple turn lane improvements, a future traffic light scenario at 144th St. and other adjacent road improvements will be needed. The exact scope and timing of those items will be addressed in a development agreement and incorporate all of MODOT requirements. To the extent this is a Conceptual plan, the exact locations of streets and access points is subject to change in accordance with the MODOT review and further engineering review.

STAFF RECOMMENDATION:

Staff recommends APPROVAL of the proposed Conceptual plan based upon adherence to the conditions contained in this report, and specifically includes the following recommended findings as contained in 400.200.B.4:

1. That the Commission has reviewed the conceptual development plan with consideration of the issues contained in Subsection (B)(3) above; and
2. That the conceptual development plan is in conformance with the comprehensive land use plan and other appropriate Sections of the Code of Ordinances; and
3. That the conceptual development plan provides for an organized and unified system of land use intensities which are compatible with the surrounding areas; and
4. That the proposed development adequately protects the health, safety and general welfare of future and existing residents and property owners in and around the development.

Respectfully Submitted,

Director of Development
